- AIRPORT TANK FARM & HYDRANT SYSTEMS
- DISPENSER & REFUELER COMPONENTS
- FUEL QUALITY INSTRUMENTATION
- FUEL MANAGEMENT SYSTEMS
- TANK GAUGING SYSTEMS
- LEAK DETECTION SYSTEMS
- FUEL DISPENSING SYSTEMS
- MONITORING & CONTROL SYSTEMS

AVIATION GROUND FUELING

YOUR ONE-STOP RESOURCE IN ASIA

Haneflex has been a market leader in the distribution of airport fuelling components for more than 30 years. We pride ourselves for being able to supply a variety of components from the refinery to the wing of the aircraft.

We are also the master distributors in greater Asia for premium ground fueling brands such as Eaton Carter Brand, Parker Velcon Filters and Gammon Technical Products.

Combined with our extensive experience in the aviation fueling industry and our in-depth knowledge of the evolving requirements by the Energy Institute, JIG and IATA, you can depend on us for all your airport fueling requirements.

TRAINING & SUPPORT

Safety in aviation fueling cannot be compromised. That is why we fully support the products that we sell to ensure you have a piece of mind as an end-user. Afterall, we are air travellers ourselves.

We offer on-location technical training services or at our facility in Singapore to ensure that your maintenance operation is in compliance with the latest operating standards. Our direct access to industry experts ensures that you can rely on us for the latest updates and information.

RETAIL & COMMERCIAL FUELING

COMPLETE FUELING SOLUTIONS FOR YOUR FLEET

Whether you own 10 or 1,000 vehicles, Haneflex is able to provide you with a complete end-to-end fueling solution for your company's diesel or petroleum fleet fueling requirements.

Our experience in this field has been developed over three decades and we provide consultancy, installation and 24/7 on-site service within Singapore. Our range of products and services focus primarily on the extensive integrated fueling solutions offered by the market leader Gilbarco Veeder-Root and its companies. This include automatic tank gauging systems, fuel dispensers, submersible pumps and fuel management systems. Our ATG systems, for example, is used at 99% of all retail stations operated by ExxonMobil, Shell, Caltex and SPC in Singapore.

FUEL QUALITY INSTRUMENTS

INSTRUMENTATION FOR QUALITY CONTROL

Emcee Electronics manufactures high quality instruments to measure electrical conductivity, water separability and filterability of explosive liquids. Several of their instruments are listed in various ASTM test methods, including the Model 1140 Micro-Separometer and the Model 1152 & 1153 Digital Conductivity Meter.

We also represent ECHA Microbiology which has been helping organisations to solve their microbiological contamination and corrosion problems for more than 30 years.

ENVIRONMENTAL CARE

Veeder-Root's leak detection technology allows owners of storage tanks to not only meet local regulatory requirements, but also provide early detection of fuel leaks that would otherwise be harmful to the environment. And your wallet.

WEB MONITORING

Everyone is connected to the internet and our fuel management systems are no different. Our web-based solutions allow you to manage and monitor your fueling operation remotely from just about anywhere.

24/7 ON-SITE SERVICE

Our team of technical specialist is available around the clock to ensure your operation runs smoothly with minimal interruptions. As well as to give you a piece of mind.
